### **DETAILED ACTION**

This application has been examined. The claims 1, 3-5, 7-20 are pending. The examination results are as following.

#### ***Reasons For Allowance***

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a display apparatus or display method for an automotive vehicle, comprising an image display section; a present position measuring section that measures a present position of the vehicle; a road map storing section that stores a road map data image; a superimpose processing section that superimposes a mark representing the present position of the vehicle on the road map data image to display the road map data image on which the mark is superimposed through the image display section; and display control section that rotates the road map data image displayed on an image screen of the image display section. The combination of the closest prior art of Hayashi (EP 0953826 A2) and Endo et al. (US 5,917,436) show a similar invention, however they fail to teach that the displayed road map data image within the region of the road map data image which is near to the displayed position at which the vehicle is present is clearer than the other region of the road map data image which is remote from the displayed position at which the vehicle is present, and the display apparatus further comprises a clearness adjusting section that adjust the clearness of the displayed image in terms of at least one of image contrast, brightness, saturation, and focus as claims 1, 16 and 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
